RESEARCH QUARTERLY
FOR EXERCISE AND SPORT
1983 VOL. 54, NO. 4, PP. 426–433

Index for Volume 54 (1983)

This index is composed of three subindexes: I. Bibliographical Index, II. Author Index and III. Topic Index.

Entries in the bibliographical index have been indexed by the last name of the author, or in the case of multiple authors by the last name of the first author. Reference information includes the name(s) of the author(s), title of the article, and the volume number and pages on which the article may be found.

The author index cites the name of each author included in the volume, followed by the volume number and pages of the article. In cases where the cited author is not the first author of the article, the first author is cited in parentheses, so that the article may then be located in the bibliographical index if desired.

In the topic index, each article is listed under those important subjects about which the article provides information. The article title with volume and page numbers is also given.

I. BIBLIOGRAPHICAL INDEX

Anthrop, Joseph and Allison, Maria T. Role conflict and the high school female athlete. *2*, 104–111.

Bain, Linda L. and Wendt, Janice C. Undergraduate physical education majors' perceptions of the roles of teacher and coach. *2*, 112–118.

Balog, Linda Farrah. The effects of exercise on muscle tension and subsequent muscle relaxation training. *2*, 119–125.

Bird, Anne Marie and Rikli, Roberta. Observational learning and practice variability. *1*, 1–4.

Brennan, Mary Alice. Dance creativity measures: A reliability study. *3*, 293–295.

Byrd, Patricia J. and Thomas, Tom R. Hydrostatic weighing during different stages of the menstrual cycle. *3*, 296–298.

Clutch, David, Wilton, Mike, McGown, Carl and Bryce, G. Rex. The effect of depth jumps and weight training on leg strength and vertical jump. *1*, 5–10.

Corbin, Charles B., Landers, Daniel M., Feltz, Deborah L. and Senior, Kathleen. Sex differences in performance estimates: female lack of confidence vs. male boastfulness. *4*, 407–410.

Cox, Richard H. Consolidation of pursuit rotor learning under conditions of induced arousal. *3*, 223–228.

Englehorn, Richard. Agonist and antagonist muscle EMG activity pattern changes with skill acquisition. *4*, 315–323.

Feldt, Leonard S. and Spray, Judith A. A theory-based comparison of the reliabilities of fixed-length and trials-to-criterion scoring of physical education skills tests. *4*, 324–329.

Fortney, Virginia L. The kinematics and kinetics of the running pattern of two-, four-, and six-year-old children. *2*, 126–135.

Gabbard, Carl, Gibbons, Emma and Elledge, Jerry. Effects of grip and forearm position on flexed-arm hang performance. *2*, 198–199.

Gagnon, Micheline, Doré, Roland and Lamontagne, Mario. Development and validation of a method for determining tridimensional angular displacements with special applications to ice hockey motions. *2*, 136–143.

Godbout, Paul, Brunelle, Jean, and Tousignant, Marielle. Academic learning time in elementary and secondary physical education classes. *1*, 11–19.

Godbout, Paul and Schutz, Robert W. Generalizability of ratings of motor performances with reference to various observational designs. *1*, 20–27.

Hardy, Charles J. The post knowledge of results interval: Effects of interpolated activity on cognitive information processing. *2*, 144–148.

Godbout, Paul and Schutz, Robert W. Generalizability of ratings of motor performances with reference to various observational designs. *1*, 20–27.

Hardy, Charles J. The post knowledge of results interval: Effects of interpolated activity on cognitive information processing. *2*, 144–148.

Harris, Janet C. Interpreting youth baseball: players' understandings of attention, winning, and playing the game. *4*, 330–339.

Haywood, Kathleen M. Responses to speed changes in coincidence-anticipation judgments after extended practice. *1*, 28–32.

Higgs, Colin. An analysis of racing wheelchairs used at the 1980 Olympic Games for the disabled. *3*, 229–233.

Hoffman, Shirl J., Imwold, Charles H. and Koller, John A. Accuracy and prediction in throwing: A taxonomic analysis of children's performance. *1*, 33–40.

Imwold, Charles H. and Hoffman, Shirl J. Visual recognition of a gymnastics skill by experienced and inexperienced instructors. *2*, 149–155.

Kleiber, Douglas A. and Roberts, Glyn C. The relationship between game and sport involvement in later childhood: A preliminary investigation. *2*, 200–203.

Langenfeld, Mark E. Glucose polymer ingestion during ultraendurance bicycling. *4*, 411–414.

Lee, Timothy D. and Magill, Richard A. Activity during the post-KR interval: effects upon performance or learning? *4*, 340–345.

Lemon, Peter W. R. A simple and inexpensive method for making sweat collection capsules. *3*, 299–301.

Lucas, John. "Three specially selected athletes" and a recapitulation of the Pennsylvania Walking Purchase of 1737. *1*, 41–47.

Magill, Richard A. and Parks, Patrick F. The psychophysics of kinethesis for positioning responses: The physical stimulus-psychological response relationship. *4*, 346–351.

Marino, G. Wayne. Selected mechanical factors associated with acceleration in ice skating. *3*, 234–238.

McMurray, Robert G., Wilson, Jessie R. and Kitchell, Barbara S. The effects of fructose and glucose on high intensity endurance performance. *2*, 156–162.

Mihevic, Patricia M. Cardiovascular fitness and the psychophysics of perceived exertion. *3*, 239–246.

Morris, A. F., Clarke, D. H. and Dainis, A. Time to maximal voluntary isometric contracting (MVC) for five different muscle groups in college adults. *2*, 163–168.

Noble, Larry and Cox, Richard H. Development of a form to survey student reactions on instructional effectiveness of lifetime sports classes. *3*, 247–254.

Park, Roberta J. Research and scholarship in the history of physical education and sport: The current state of affairs. *2*, 93–103.

Plagenhoef, Stanley, Evans, F. Gaynor and Abdelnour, Thomas. Anatomical data for analyzing human motion. *2*, 169–178.

Powers, Scott K., Dodd, Stephen, Deason, Richard, Byrd, Ronald and McKnight, Tipton. Ventilatory threshold, running economy and distance running performance of trained athletes. *2*, 179–182.

Puretz, Susan L. Bilateral transfer: The effects of practice on the transfer of complex dance movement patterns. *1*, 48–54.

Reeve, T. Gilmour and Mainor, Robert. Effects of movement context on the encoding of kinesthetic spatial information. *4*, 352–363.

Roche, Alex F., Tyleshevski, Frances, and Rogers, Evan. Non-invasive measurements of physical maturity in children. *4*, 364–371.

Sady, Stanley P., Katch, Victor L., Villanacci, John F. and Gilliam, Thomas B. Children-adult comparisons of $\dot{V}O_2$ and HR kinetics during submaximum exercise. *1*, 55–59.

Sady, Stanley P., Savage, Mark P., Thomson, Wade H., and Petratis, Marlene M. The reliability of the $\dot{V}O_2$-HR relation during graded treadmill exercise in prepubertal boys and adult men. *3*, 302–304.

Safrit, Margaret J. and Wood, Terry M. The health-related fitness test opinionnaire: A pilot survey. *2*, 204–207.

Schempp, Paul G., Cheffers, John T. F. and Zaichkowsky, Leonard D. Influence of decision-making on attitudes, creativity, motor skills and self-concept in elementary children. *2*, 183–189.

Schutz, Robert W., Smoll, Frank L. and Gessaroli, Marc E. Multivariate statistics: A self-test and guide to their utilization. *3*, 255–263.

Shick, Jacqueline and Berg, Nancy Gadd. Indoor golf skill test for junior high school boys. *1*, 75–78.

Shick, Jacqueline, Stoner, Lela June and Jette, Nadine. Relationship between modern-dance experience and balancing performance. *1*, 79–82.

Smith, Ronald A. Preludes to the NCAA: Early failures of faculty intercollegiate athletic control. *4*, 372–382.

Southard, Dan. Importance of selected competencies and relationship to corresponding coursework in programs of teacher preparation. *4*, 383–388.

Spirduso, Waneen W. Exercise and the aging brain. (The 1982 C. H. McCloy Research Lecture) *2*, 208–218.

Sprague, Paul and Mann, Ralph V. The effects of muscular fatigue on the kinetics of sprint running. *1*, 60–66.

Tangen-Foster, James W. and Lathen, Calvin W. Risk sports in basic instruction programs: A status assessment. *3*, 305–308.

Thomas, Jerry R., Thomas, Katherine T., Lee, Amelia M., Testerman, Edwyne and Ashy, Madge. Age differences in use of strategy for recall of movement in a large scale environment. *3*, 264–272.

Tucker, Larry A. Effect of weight training on self-concept: A profile of those influenced most. *4*, 389–397.

Upton, S. J., Hagan, R. D., Rosentswieg, J. and Gettman, L. R. Comparison of the physiological profiles of middle-aged women distance runners and sedentary women. *1*, 83–87.

Vogler, E. William and French, Ron W. The effects of a group contingency strategy on behaviorally disordered students in physical education. *3*, 273–277.

Weiss, Maureen R. Modeling and motor performance: A developmental perspective. *2*, 190–197.

Wiggins, David K. The 1936 Olympic Games in Berlin: The response of American's black press. *3*, 278–292.

Williams, Jean M. and Miller, Donna Mae. Intercollegiate athletic administration: Preparation patterns. *4*, 398–406.

Wilmore, Jack H. Appetite and body composition consequent to physical activity. (The 1983 C. H. McCloy Research Lecture) *4*, 415–425.

Wrisberg, Craig A. and Mead, Barbara J. Developing coincident timing skill in children: A comparison of training methods. *1*, 67–74.

II. AUTHOR INDEX

Abdelnour, Thomas. *2*, 169–178. (Plagenhoef)
Allison, Maria T. *2*, 104–111. (Anthrop)
Anthrop, Joseph. *2*, 104–111.
Ashy, Madge. *3*, 264–272. (Thomas, Jerry R.)

Bain, Linda L. *2*, 112–118.
Balog, Linda Farrah. *2*, 119–125.
Berg, Nancy Gadd. *1*, 75–78. (Shick)
Bird, Anne Marie. *1*, 1–4.
Brennan, Mary Alice. *3*, 293–295.
Brunelle, Jean. *1*, 11–19. (Godbout)
Bryce, G. Rex. *1*, 5–10. (Clutch)
Byrd, Patricia J. *3*, 296–298.
Byrd, Ronald. *2*, 179–182. (Powers)

Cheffers, John T. F. *2*, 183–189. (Schempp)
Clarke, D. H. *2*, 163–168. (Morris)
Clutch, David. *1*, 5–10.
Corbin, Charles B. *4*, 407–410.
Cox, Richard H. *3*, 223–228.
Cox, Richard H. *3*, 247–254. (Noble)

Dainis, A. *2*, 163–168. (Morris)
Deason, Richard. *2*, 179–182. (Powers)
Dodd, Stephen, *2*, 179–182. (Powers)
Doré, Roland. *2*, 136–143. (Gagnon)

Elledge, Jerry. *2*, 198–199. (Gabbard)
Engelhorn, Richard. *4*, 315–323.
Evans, F. Gaynor. *2*, 169–178. (Plagenhoef)

Feldt, Leonard S. *4*, 324–329.
Feltz, Deborah L. *4*, 407–410. (Corbin)
Fortney, Virginia L. *2*, 126–135.
French, Ron W. *3*, 273–277. (Vogler)

Gabbard, Carl. *2*, 198–199.
Gagnon, Micheline. *2*, 136–143.
Gessaroli, Marc E. *3*, 255–263. (Schutz)
Gettman, L. R. *1*, 83–87. (Upton)

III. TOPIC INDEX

A

AAHPERD fitness test. The Health-Related Fitness Test opinionnaire: A pilot survey. *2,* 204–207.
Academic learning time. ——— in elementary and secondary physical education classes. *1,* 11–19.
Action increment, action decrement. Consolidation of pursuit rotor learning under conditions of induced arousal. *3,* 223–228.
Adult men. The reliability of the $\dot{V}O_2$-HR relation during graded treadmill exercise in prepubertal boys and ———. *3,* 302–304.
Adults. Children-adult comparisons of $\dot{V}O_2$ and HR kinetics during submaximum exercise. *1,* 55–59.
Age. Comparison of the physiological profiles of middle-aged women distance runners and sedentary women. *1,* 83–87.
Age differences. ——— in use of strategy for recall of movement in a large scale environment. *3,* 264–272.
Age differences. Modeling and motor performance: A developmental perspective. *2,* 190–197.
Aging. Exercise and the ——— brain. *2,* 208–218.
AIAW. (Association of Intercollegiate Athletics for Women). Intercollegiate athletic administration: Preparation patterns. *4,* 398–406.
Amateur Athletic Union (AAU). The 1936 Olympic Games in Berlin: The response of America's black press. *3,* 278–292.
Anatomical data. ——— for analyzing human motion. *2,* 169–178.
Anthropometry. Appetite and body composition consequent to physical activity. *4,* 415–425.
Appetite. ——— and body composition consequent to physical activity. *4,* 415–425.
Athletic administration. Intercollegiate ———: Preparation patterns. *4,* 398–406.
Athletics, Intercollegiate administration of. Preludes to the NCAA: Early failures of faculty intercollegiate athletic control. *4,* 372–382.
Attention, concentration. Interpreting youth baseball: Players' understandings of attention, winning, and playing the game. *4,* 330–339.

B

Balance, static and dynamic. Relationship between modern-dance experience and balancing performance. *1,* 79–82.
Baseball. Interpreting youth ———: Players' understandings of attention, winning, and playing the game. *4,* 330–339.
Behaviorally disordered. The effects of a group contingency strategy on ——— students in physical education. *3,* 273–277.
Bias effects. Responses to speed changes in coincidence-anticipation judgments after extended practice. *1,* 28–32.
Bicycling. Glucose polymer ingestion during ultraendurance bicycling. *4,* 411–414.
Bilateral transfer. ———: The effects of practice on the transfer of complex dance movement patterns. *1,* 48–54.
Black athletes. The 1936 Olympic Games in Berlin: The response of America's black press. *3,* 278–292.
Body composition. Appetite and ——— consequent to physical activity. *4,* 415–425.
Body composition. Comparison of the physiological profiles of middle-aged women distance runners and sedentary women. *1,* 83–87.
Body composition, body density. Hydrostatic weighing during different stages of the menstrual cycle. *3,* 296–298.
Boys. The reliability of the $\dot{V}O_2$-HR relation during graded treadmill exercise in prepubertal boys and adult men. *3,* 302–304.
Brain. Exercise and the aging ———. *2,* 208–218.

C

Carbohydrate metabolism. The effects of fructose and glucose on high intensity endurance performance. *2,* 156–162.
Children. Children-adult comparisons of $\dot{V}O_2$ and HR kinetics during submaximum exercise. *1,* 55–59.
Children. Influence of decision-making on attitudes, creativity, motor skills and self-concept in elementary ———. *2,* 183–189.
Children. Non-invasive measurements of physical maturity in children. *4,* 364–371.
Children, running pattern of. The kinematics and kinetics of the running pattern of two-, four-, and six-year-old children. *2,* 126–135.
Children's games and sports. The relationship between game and sport involvement in later childhood: A preliminary investigation. *2,* 200–203.
Children's motor learning. Developing coincident timing skill in children: A comparison of training methods. *1,* 67–74.
Coach. Undergraduate physical education majors' perceptions of the roles of teacher and coach. *2,* 112–118.
Cognitive information processing. The post knowledge of results interval: Effects of interpolated activity on ———. *2,* 144–148.

Coincidence-anticipation. Developing coincident timing skill in children: A comparison of training methods. *1*, 67–74.

Coincidence-anticipation. Responses to speed changes in ____ judgments after extended practice. *1*, 28–32.

Competencies, in teacher preparation. Importance of selected competencies and relationship to corresponding coursework in programs of teacher preparation. *4*, 383–388.

Conferences, athletic. Preludes to the NCAA: Early failures of faculty intercollegiate athletic control. *4*, 372–382.

Consolidation theory. Consolidation of pursuit rotor learning under conditions of induced arousal. *3*, 223–228.

Creativity. Dance ____ measures: A reliability study. *3*, 293–295.

Creativity. Influence of decision-making on attitudes, ____, motor skills and self-concept in elementary children. *2*, 183–189.

Curriculum. Importance of selected competencies and relationship to corresponding coursework in programs of teacher preparation. *4*, 383–388.

Curriculum. Intercollegiate athletic administration: Preparation patterns. *4*, 398–406.

Curriculum. Risk sports in basic instruction programs: A status assessment. *3*, 305–308.

D

Dance. ____ creativity measures: a reliability study. *3*, 293–295.

Dance, modern. Bilateral transfer: The effects of practice on the transfer of complex dance movement patterns. *1*, 48–54.

Dance, modern. Relationship between modern-dance experience and balancing performance. *1*, 79–82.

Decision-making. Influence of ____ on attitudes, creativity, motor skills and self-concept in elementary children. *2*, 183–189.

Dehydration. Glucose polymer ingestion during ultraendurance bicycling. *4*, 411–414.

Depth jumps. The effect of ____ and weight training on leg strength and vertical jump. *1*, 5–10.

Directional bias. Responses to speed changes in coincidence-anticipation judgments after extended practice. *1*, 28–32.

Dopamine. Exercise and the aging brain. *2*, 208–218.

E

Emotionally disturbed. The effects of a group contingency strategy on behaviorally disordered students in physical education. *3*, 273–277.

Endurance. Glucose polymer ingestion during ultraendurance bicycling. *4*, 411–414.

Engagement time. Academic learning time in elementary and secondary physical education classes. *1*, 11–19.

Ethnographic sport research. Interpreting youth baseball: Players' understandings of attention, winning, and playing the game. *4*, 330–339.

Evaluation. Development of a form to survey student reactions on instructional effectiveness of lifetime sports classes. *3*, 247–254.

Exercise. The effects of ____ on muscle tension and subsequent muscle relaxation training. *2*, 119–125.

Exercise. The effects of fructose and glucose on high intensity endurance performance. *2*, 156–162.

Exercise. A simple and inexpensive method for making sweat collection capsules. *3*, 299–301.

Exercise effects. Exercise and the aging brain. *2*, 208–218.

Exercise intensity. Cardiovascular fitness and the psychophysics of perceived exertion. *3*, 239–246.

F

Fatigue. The effects of muscular ____ on the kinetics of sprint running. *1*, 60–66.

Female athletes. Role conflict and the high school female athlete. *2*, 104–111.

Fitness. Cardiovascular ____ and the psychophysics of perceived exertion. *3*, 239–246.

Fitness. The Health-Related Fitness Test opinionnaire: A pilot survey. *2*, 204–207.

Flexed-arm hand. Effects of grip and forearm position on ____ performance. *2*, 198–199.

Fluid retention. Hydrostatic weighing during different stages of the menstrual cycle. *3*, 196–298.

Fructose ingestion. The effects of fructose and glucose on high intensity endurance performance. *2*, 156–162.

G

Games (informal) and organized sports. The relationship between game and sport involvement in later childhood: A preliminary investigation. *2*, 200–203.

Generalizability. ____ of ratings of motor performances with reference to various observational designs. *1*, 20–27.

Glucose feeding. Glucose polymer ingestion during ultraendurance bicycling. *4*, 411–414.

Golf. Indoor ____ skill test for junior high school boys. *1*, 75–78.

Graduate programs. Intercollegiate athletic administration: Preparation patterns. *4*, 398–406.

Group contingency. The effects of a ____ strategy on behaviorally disordered students in physical education. *3*, 273–277.

Gymnastics. Visual recognition of a ____ skill by experienced and inexperienced instructors. *2*, 149–155.

H

Handicapped. An analysis of racing wheelchairs used at the 1980 Olympic Games for the Disabled. *3*, 229–233.

Health-Related Fitness Test. The ____ opinionnaire: A pilot survey. *2*, 204–207.

Heart rate. Children-adult comparisons of $\dot{V}O_2$ and HR kinetics during submaximum exercise. *1*, 55–59.

Heart rate. The reliability of the $\dot{V}O_2$-HR relation during graded treadmill exercise in prepubertal boys and adult men. *3*, 302–304.

Hidromeiosis. A simple and inexpensive method for making sweat collection capsules. *3*, 299–301.

History of physical education and sport. Research and scholarship in the history of physical education and sport: The current state of affairs. *2*, 93–103.

Hockey, ice. Development and validation of a method for determining tridimensional angular displacements with special applications to ice hockey motions. *2*, 136–143.

Hockey, ice skating. Selected mechanical factors associated with acceleration in ice skating. *3*, 234–238.

I

Instructional outcomes, instructional effectiveness. Development of a form to survey student reactions on instructional affectiveness of lifetime sports classes. *3*, 247–254.

Intercollegiate athletic administration. _____: Preparation patterns. *4*, 398–406.

Intercollegiate athletics. Preludes to the NCAA: Early failures of faculty intercollegiate athletic control. *4*, 372–382.

Interpolated activity. The post knowledge of results interval: Effects of _____ on cognitive information processing. *2*, 144–148.

Isometric strength. Time to maximal voluntary isometric contraction (MVC) for five different muscle groups in college adults. *2*, 163–168.

K

Kinematics. The _____ and kinetics of the running pattern of two-, four-, and six-year-old children. *2*, 126–135.

Kinetics. Children-adult comparisons of $\dot{V}O_2$ and HR kinetics during submaximum exercise. *1*, 55–59.

Kinetics. The effects of muscular fatigue on the _____ of sprint running. *1*, 60–66.

Kinetics. The kinematics and _____ of the running pattern of two-, four-, and six-year-old children. *2*, 126–135.

Knowledge of results. The post _____ interval: Effects of interpolated activity on cognitive information processing. *2*, 144–148.

Knowledge of results, KR. Activity during the post-KR interval: Effects upon performance or learning? *4*, 340–345.

L

Learning. Consolidation of pursuit rotor _____ under conditions of induced arousal. *3*, 223–228.

Learning time. Academic _____ in elementary and secondary physical education classes. *1*, 11–19.

Liability. Risk sports in basic instruction programs: A status assessment. *3*, 305–308.

Location and extent movements. The psychophysics of kinesthesis for positioning responses: The physical stimulus-psychological response relationship. *4*, 346–351.

M

Marathon. "Three specially selected athletes" and a recapitulation of the Pennsylvania Walking Purchase of 1737. *1*, 41–47.

Maturity. Non-invasive measurements of physical maturity in children. *4*, 364–371.

Measurement. Indoor golf skill test for junior high school boys. *1*, 75–78.

Measurement, observational. Generalizability of ratings of motor performances with reference to various observational designs. *1*, 20–27.

Memory development. Age differences in use of strategy for recall of movement in a large scale environment. *3*, 264–272.

Memory for movement. Age differences in use of strategy for recall of movement in a large scale environment. *3*, 264–272.

Menstrual cycle, effect on weight. Hydrostatic weighing during different stages of the menstrual cycle. *3*, 296–298.

Metathetic vs. prothetic. The psychophysics of kinesthesis for positioning responses: the physical stimulus-psychological response relationship. *4*, 346–351.

Methodology. Development and validation of a method for determining tridimensional angular displacements with special applications to ice hockey motions. *2*, 136–143.

Modeling. _____ and motor performance: A developmental perspective. *2*, 190–197.

Modeling. Observational learning and practice variability. *1*, 1–4.

Motion, human. Anatomical data for analyzing human motion. *2*, 169–178.

Motor control. Exercise and the aging brain. *2*, 208–218.

Motor development. Accuracy and prediction in throwing: A taxonomic analysis of children's performance. *1*, 33–40.

Motor development. The kinematics and kinetics of the running pattern of two-, four-, and six-year-old children. *2*, 126–135.

Motor learning. Effects of movement context on the encoding of kinesthetic spatial information. *4*, 352–363.

Motor learning. Observational learning and practice variability. *1*, 1–4.

Motor learning, control. Agonist and antagonist muscle EMG activity pattern changes with skill acquisition. *4*, 315–323.

Motor learning and performance. Activity during the post-KR interval: Effects upon performance or learning? *4*, 340–345.

Motor patterns, complex. Bilateral transfer: The effects of practice on the transfer of complex dance movement patterns. *1*, 48–54.

Motor performance. Generalizability of ratings of motor performances with reference to various observational designs. *1*, 20–27.

Motor performance. Modeling and _____: A developmental perspective. *2*, 190–197.

Movement context, movement encoding and memory. Effects of movement context on the encoding of kinesthetic spatial information. *4*, 352–363.

Multivariate analysis, multivariate statistics. Multivariate statistics: A self-test and guide to their utilization. *3*, 255–263.

Muscles. Agonist and antagonist muscle EMG activity pattern changes with skill acquisition. *4*, 315–323.

Muscle tension. The effects of exercise on _____ and subsequent muscle relaxation training. *2*, 119–125.

Muscular endurance. Effects of grip and forearm position on flexed-arm hang performance. *2*, 198–199.

N

Nazi Olympics. The 1936 Olympic Games in Berlin: The response of America's black press. *3*, 278–292.

NCAA (National Collegiate Athletic Association). Intercollegiate athletic administration: Preparation patterns. *4*, 398–406.

NCAA. Preludes to the NCAA: Early failures of faculty intercollegiate athletic control. *4*, 372–382.

Non-invasive measurements. _____ of physical maturity in children. *4*, 364–371.

O

Observational learning. _____ and practice variability. *1*, 1–4.

Olympic Games. The 1936 _____ in Berlin: The response of America's black press. *3*, 278–292.

Olympic Games for the Disabled. An analysis of racing wheelchairs used at the 1980 _____. *3*, 229–233.

Oxygen consumption. The reliability of the $\dot{V}O_2$-HR relation during graded treadmill exercise in prepubertal boys and adult men. *3*, 302–304.

Oxygen uptake. Children-adult comparisons of $\dot{V}O_2$ and HR kinetics during submaximum exercise. *1*, 55–59.

P

Parkinson's disease. Exercise and the aging brain. *2*, 208–218.

Pennsylvania Walking Purchase. "Three specially selected athletes" and a recapitualization of the ——— of 1737. *1*, 41–47.

Perceived exertion. Cardiovascular fitness and the psychophysics of ———. *3*, 239–246.

Performance estimates. Sex differences in performance estimates: Female lack of confidence vs. male boastfulness. *4*, 407–410.

Physical education majors. Undergraduate physical education majors' perceptions of the roles of teacher and coach. *2*, 112–118.

Playing. Interpreting youth baseball: Players' understandings of attention, winning, and ——— the game. *4*, 330–339.

Plyometrics. The effect of depth jumps and weight training on leg strength and vertical jump. *1*, 5–10.

Post knowledge of results interval. The ———: Effects of interpolated activity on cognitive information processing. *2*, 144–148.

Post-KR (knowledge of results) activity. Activity during the post-KR interval: Effects upon performance or learning? *4*, 340–345.

Practice. Bilateral transfer: The effects of ——— on the transfer of complex dance movement patterns. *1*, 48–54.

Practice variability. Observational learning and practice variability. *1*, 1–4.

Prediction. Accuracy and ——— in throwing: A taxonomic analysis of children's performance. *1*, 33–40.

Psychophysics. Cardiovascular fitness and the ——— of perceived exertion. *3*, 239–246.

Psychophysics of kinesthesis. The ——— for positioning responses: The physical stimulus-psychological response relationship. *4*, 346–351.

R

Race relations. The 1936 Olympic Games in Berlin: The response of America's black press. *3*, 278–292.

Reliability. Generalizability of ratings of motor performances with reference to various observational designs. *1*, 20–27.

Reliability. The ——— of the $\dot{V}O_2$-HR relation during graded treadmill exercise in prepubertal boys and adult men. *3*, 302–304.

Reliability. A theory-based comparison of the reliabilities of fixed-length and trials-to-criterion scoring of physical education skills tests. *4*, 324–329.

Research, in the history of physical education and sport. Research and Scholarship in the history of physical education and sport: The current state of affairs. *2*, 93–103.

Retention. Activity during the post-HR interval: Effects upon performance or learning? *4*, 340–345.

Risk sports. ——— in basic instruction programs: A status assessment. *3*, 305–308.

Role conflict. ——— and the high school female athlete. *2*, 104–111.

Role perceptions, role conflict, role preferences. Undergraduate physical education majors' perceptions of the roles of teacher and coach. *2*, 112–118.

Runners. Comparison of the physiological profiles of middle-aged women distance runners and sedentary women. *1*, 83–87.

Running. The effects of muscular fatigue on the kinetics of sprint ———. *1*, 60–66.

Running. The kinematics and kinetics of the running pattern of two-, four-, and six-year-old children. *2*, 126–135.

Running. "Three specially selected athletes" and a recapitulation of the Pennsylvania Walking Purchase of 1737. *1*, 41–47.

Running performance. Ventilatory threshold, running economy and distance ——— of trained athletes. *2*, 179–182.

S

Safety. Risk sports in basic instruction programs: A status assessment. *3*, 305–308.

Self-concept. Effect of weight training on ———: A profile of those influenced most. *4*, 389–397.

Self-confidence. Sex difference in performance estimates: Female lack of confidence vs. male boastfulness. *4*, 407–410.

Sex differences, in motor performance. See self-confidence.

Sex roles, sex differences. Role conflict and the high school female athlete. *2*, 104–111.

Skill acquisition. Agonist and antagonist muscle EMG activity pattern changes with ———. *4*, 315–323.

Skill instruction, skill analysis. Visual recognition of a gymnastic skill by experienced and inexperienced instructors. *2*, 149–155.

Skills test. Indoor golf skills test for junior high school boys. *1*, 75–78.

Skills test. A theory-based comparison of the reliabilities of fixed-length and trials-to-criterion scoring of physical education skills tests. *4*, 324–329.

Speed judgments. Responses to speed changes in coincidence-anticipation judgments after extended practice. *1*, 28–32.

Sports, organized vs. informal games in childhood. The relationship between games and sport involvement in later childhood: A preliminary investigation. *2*, 200–203.

Sprinting. The effects of muscular fatigue on the kinetics of sprint running. *1*, 60–66.

Statistical methods. Multivariate statistics: A self-test and guide to their utlization. *3*, 255–263.

Strategy use. Age differences in use of strategy for recall of movement in a large scale environment. *3*, 264–272.

Strength, isometric, male and female. Time to maximal voluntary isometric contraction (MVC) for five different muscle groups in college adults. *2*, 163–168.

Sweat composition, sweat volume. A simple and inexpensive method for making sweat collection capsules. *3*, 299–301.

T

Taxonomy. Accuracy and prediction in throwing: A taxonomic analysis of children's performance. *1*, 33–40.

Teacher. Undergraduate physical education majors' perceptions of the roles of teacher and coach. *2*, 112–118.

Teacher effectiveness. Development of a form to survey student reactions on instructional effectiveness of lifetime sports classes. *3*, 247–254.

Teacher preparation. Importance of selected competencies and relationship to corresponding coursework in programs of ———. *4*, 383–388.

Teaching methods. Influence of decision-making on attitudes, creativity, motor skills and self-concept in elementary children. *2*, 183–189.

Testing, skills. A theory-based comparison of the reliabilities of fixed-length and trials-to-criterion scoring of physical education skills tests. *4*, 324–329.

Throwing. Accuracy and prediction in ——: A taxonomic analysis of children's performance. *1,* 33–40.
Tridimensional angular displacements. Development and validation of a method for determining —— with special applications to ice hockey motions. *2,* 136–143.

V

Variability of practice. Developing coincident timing skills in children: A comparison of training methods. *1,* 67–74.
Ventilatory threshold. ——, running economy and distance running performance of trained athletes. *2,* 179–182.
Vertical jump. The effect of depth jumps and weight training on leg strength and ——. *1,* 5–10.

W

Weber's Law. The psychophysics of kinesthesis for positioning responses: The physical stimulus-psychological response relationship. *4,* 346–351.
Weight training. The effect of depth jumps and —— on leg strength and vertical jump. *1,* 5–10.
Weight training. Effect of —— on self-concept: A profile of those influenced most. *4,* 389–397.
Wheelchair construction. An analysis of racing wheelchairs used at the 1980 Olympic Games for the Disabled. *2,* 229–233.
Winning. Interpreting youth baseball: Players' understandings of attention, ——, and playing the game. *4,* 330–339.
Women. Comparison of the physiological profiles of middle-aged women distance runners and sedentary women. *1,* 83–87.

Y

Youth sports. Interpreting youth baseball: Players' understandings of attention, winning, and playing the game. *4,* 330–339.

Research Quarterly
For Exercise and Sport
1983, Vol. 54, No. 4, pp. 434–437

List of Reviewers

The Editor-in-Chief gratefully acknowledges the invaluable assistance of the individuals listed below who reviewed manuscripts for the *Research Quarterly for Exercise and Sport* during the period October 15, 1982–October 1, 1983.

The following persons reviewed six or more manuscripts during the period October 15, 1982–October 1, 1983:

Susan Birrell
University of Iowa
Iowa City, IA

George A. Brooks
University of California
Berkeley, CA

Priscilla M. Clarkson
University of Massachusetts
Amherst, MA

Edward J. Coyle
University of Texas
Austin, TX

Kirk J. Cureton
University of Georgia
Athens, GA

Andrew Dainis
University of Maryland
College Park, MD

Charles J. Dillman
United States Olympic Committee
Colorado Springs, CO

Jimmy Disch
Rice University
Houston, TX

Charles O. Dotson
University of Maryland
College Park, MD

Mary Duquin
University of Pittsburgh
Pittsburgh, PA

Bruce Elliott
University of Western Australia
Nedlands, AUSTRALIA

Deborah L. Feltz
Michigan State University
East Lansing, MI

Carl Foster
Mt. Sinai Medical Center
Milwaukee, WI

Patty Freedson
University of Massachusetts
Amherst, MA

John J. Garhammer
International Maxachievement Institutes
Long Beach, CA

Robert N. Girandola
University of Southern California
Los Angeles, CA

Paul Godbout
University of Laval
Quebec, CANADA

Robert J. Gregor
University of California
Los Angeles, CA

Joseph J. Gruber
University of Kentucky
Lexington, KY

Steven Heyman
University of Wyoming
Laramie, WY

Allen Jackson
North Texas State University
Denton, TX

Andrew S. Jackson
University of Houston
Houston, TX

Frank I. Katch
University of Massachusetts
Amherst, MA

Victor L. Katch
University of Michigan
Ann Arbor, MI

Jay T. Kearney
University of Kentucky
Lexington, KY

Harry King
San Diego State University
San Diego, CA

Don R. Kirkendall
Kansas State University
Manhattan, KS

Wendell Liemohn
University of Tennessee
Knoxville, TN

Ben R. Londeree
University of Missouri
Columbia, MO

Richard A. Magill
Louisiana State University
Baton Rouge, LA

Patricia Mihevic
University of California
Santa Barbara, CA

Dale P. Mood
University of Colorado
Boulder, CO

Alfred Morris
University of Illinois
Urbana, IL

Harold Morris
Indiana University
Bloomington, IN

James R. Morrow, Jr.
University of Houston
Houston, TX

Jack K. Nelson
Louisiana State University
Baton Rouge, LA

Sharon A. Plowman
North Illinois University
DeKalb, IL

Carol Putnam
Dalhousie University
Halifax, CANADA

G. Lawrence Rarick
University of California
Berkeley, CA

Mary Lou Remley
Indiana University
Bloomington, IN

Roberta Rikli
California State University
Fullerton, CA

Mary Ann Roberton
University of Wisconsin
Madison, WI

Anne L. Rothstein
Herbert H. Lehman College
City University of New York
Bronx, NY

Stanley Sady
The Miriam Hospital
Providence, RI

R. W. Schutz
University of British Columbia
Vancouver, CANADA

Wayne A. Sinning
Kent State University
Kent, OH

James Skinner
Arizona State University
Tempe, AZ

Robert J. Sonstroem
University of Rhode Island
Kingston, RI

Judith Spray
San Diego State University
San Diego, CA

Bryant A. Stamford
University of Louisville
Louisville, KY

G. Alan Stull
University of Minnesota
Minneapolis, MN

Robert S. Weinberg
North Texas State University
Denton, TX

Christine A. Wells
Arizona State University
Tempe, AZ

Keith Williams
University of California
Davis, CA

Jack H. Wilmore
University of Arizona
Tucson, AZ

Craig Wrisberg
University of Tennessee
Knoxville, TN

Howard Zelaznik
Purdue University
West Lafayette, IN

The following persons reviewed one to five manuscripts during the period of October 15, 1982–October 1, 1983:

Marlene Adrian
University of Illinois
Urbana, IL

Linda L. Bain
University of Houston
Houston, TX

Barry T. Bates
University of Oregon
Eugene, OR

Ted A. Baumgartner
University of Georgia
Athens, GA

Ann M. Baylor
University of Texas
Austin, TX

Anne Marie Bird
California State University
Fullerton, CA

Steven Blair
University of South Carolina
Columbia, SC

Richard A. Boileau
University of Illinois
Urbana, IL

Arend Bonen
Dalhousie University
Halifax, CANADA

Michael Booth
University of Ottawa
Ottawa, CANADA

Richard W. Bowers
Bowling Green State University
Bowling Green, OH

Larry Brawley
University of Waterloo
Waterloo, CANADA

Geoffrey Broadhead
Louisiana State University
Baton Rouge, LA

Jan Broekhoff
University of Oregon
Eugene, OR

G. Rex Bryce
Brigham Young University
Provo, UT

Elsworth R. Buskirk
Pennsylvania State University
University Park, PA

Ronald J. Byrd
Louisiana State University
Baton Rouge, LA

Albert V. Carron
University of Western Ontario
London, CANADA

Garry Chick
University of Illinois
Urbana, IL

Robert W. Christina
Pennsylvania State University
University Park, PA

Alan D. Claremont
Oregon State University
Corvallis, OR

David H. Clarke
Indiana University
Bloomington, IN

Jay J. Coakley
University of Colorado
Colorado Springs, CO

Charles C. Corbin
Arizona State University
Tempe, AZ

David L. Costill
Ball State University
Muncie, IN

Richard Cox
Kansas State University
Manhattan, KS

Herbert A. de Vries
University of Southern California
Los Angeles, CA

Rod K. Dishman
University of California
Davis, CA

Barbara Drinkwater
University of Washington
Seattle, WA

Paul DuBois
Bridgewater State College
Bridgewater, MA

Paul Dungam, Jr.
University of Wyoming
Laramie, WY

George Eisen
California State Polytechnic University
Pomona, CA

B. Don Franks
University of Tennessee
Knoxville, TN

Bud Getchell
Ball State University
Muncie, IN

Larry R. Gettman
Mesa Petroleum Company
Amarillo, TX

Diane Gill
University of Iowa
Iowa City, IA

Lawrence Golding
University of Nevada
Las Vegas, NV

Daniel Gould
Kansas State University
Manhattan, KS

Susan Greendorfer
University of Illinois
Urbana, IL

Lolas E. Halverson
University of Wisconsin
Madison, WI

Dorothy V. Harris
Pennsylvania State University
University Park, PA

Janet Harris
University of North Carolina
Greensboro, NC

William L. Haskell
Stanford University Medical School
Palo Alto, CA

Marilyn Hinson
Texas Woman's University
Denton, TX

Shirl J. Hoffman
University of Pittsburgh
Pittsburgh, PA

Richard C. Hohn
University of South Carolina
Columbia, SC

Edward T. Howley
University of Tennessee
Knoxville, TN

L. Dennis Humphrey
Southwest Missouri State University
Springfield, MO

A. H. Ismail
Purdue University
West Lafayette, IN

John Ivy
University of Texas
Austin, TX

Eliezer Kamon
Pennsylvania State University
University Park, PA

J. A. Scott Kelso
Haskins Laboratories
New Haven, CT

Jack Keogh
University of California
Los Angeles, CA

Beth Kerr
University of Washington
Seattle, WA

Douglas A. Kleiber
University of Illinois
Urbana, IL

Paavo Komi
University of Jyvaskyla
Jyvaskyla, FINLAND

Gary Krahenbuhl
Arizona State University
Tempe, AZ

R. Scott Kretchmar
State University of New York
Brockport, NY

Walter Kroll
University of Massachusetts
Amherst, MA

Doug Larish
University of Iowa
Iowa City, IA

Timothy G. Lohman
University of Illinois
Urbana, IL

John Lucas
Pennsylvania State University
University Park, PA

Michael G. Maksud
Oregon State University
Corvallis, OR

Robert M. Malina
University of Texas
Austin, TX

William D. McArdle
Queens College
Flushing, NY

Lynn W. McCraw
University of Texas
Austin, TX

Penny McCullagh-Wallace
University of Colorado
Boulder, CO

Wayne C. McKinney
Southwest Missouri State University
Springfield, MO

Barry D. McPherson
University of Waterloo
Waterloo, Ontario, CANADA

Alan Metcalfe
University of Windsor
Windsor, Ontario, CANADA

Robert J. Moffatt
Western Washington University
Bellingham, WA

William P. Morgan
University of Wisconsin
Madison, WI

Loren G. Myhre
School of Aerospace Medicine
Brooks Air Force Base, TX

Francis J. Nagle
University of Wisconsin
Madison, WI

Richard C. Nelson
Pennsylvania State University
University Park, PA

Karl Newell
University of Illinois
Urbana, IL

Bruce J. Noble
University of Wyoming
Laramie, WY

Mary Lou Norrie
University of California
Berkeley, CA

David Pargman
Florida State University
Tallahassee, FL

Robert Park
University of California
Berkeley, CA

Michael W. Passer
University of Washington
Seattle, WA

Russel R. Pate
University of South Carolina
Columbia, SC

Sally Phillips
University of Maryland
College Park, MD

Stanley Picou
Texas A&M University
College Station, TX

Stanley Plagenhoef
University of Massachusetts
Amherst, MA

Michael Pollock
Mount Sinai Medical Center
Milwaukee, WI

Scott Powers
Louisiana State University
Baton Rouge, LA

Jackie Puhl
Iowa State University
Ames, IA

Gerald Redmond
University of Alberta
Edmonton, CANADA

T. Gilmour Reeve
Auburn University
Auburn, AL

Glyn C. Roberts
University of Illinois
Urbana, IL

Margaret Jo Safrit
University of Wisconsin
Madison, WI

George H. Sage
University of Northern Colorado
Greeley, CO

Tara Scanlon
University of California
Los Angeles, CA

Richard A. Schmidt
University of California
Los Angeles, CA

Diane Shapiro
University of California
Los Angeles, CA

Charles H. Shea
Texas A&M University
College Station, TX

John B. Shea
Pennsylvania State University
University Park, PA

Jacqueline M. Shick
University of Minnesota
Minneapolis, MN

Francis X. Short
State University of New York
Brockport, NY

John M. Silva III
University of North Carolina
Chapel Hill, NC

Stephen Silverman
Louisiana State University
Baton Rouge, LA

Robert N. Singer
Florida State University
Tallahassee, FL

Mary Slaughter
University of Illinois
Urbana, IL

Waneen Wyrick Spirduso
University of Texas
Austin, TX

Elmer Spreitzer
Bowling Green State University
Bowling Green, OH

Carol L. Stamm
Western Michigan University
Kalamazoo, MI

Judith A. Stern
University of California
Davis, CA

Nancy Struna
University of Maryland
College Park, MD

Nancy Theberge
University of Waterloo
Waterloo, Ontario, CANADA

Jerry R. Thomas*
Louisiana State University
Baton Rouge, LA

Jo Anne L. Thorpe
